Dräger PSS® 3000 Compressed Air Breathing Apparatus

The Dräger PSS® 3000 is a new generation of high performing breathing apparatus for firefighters. Combining comfort with exceptional pneumatic performance, it is designed for applications where simplicity and ease of use are key essentials. Lightweight yet robust, and easy to don, this advanced breathing apparatus provides the ultimate in breathing protection.

- LIGHT, ROBUST AND SIMPLE TO USE
- ENHANCED CARRYING SYSTEM
- PROVEN AIR SUPPLY TECHNOLOGY
- INTEGRATED HOSES
- EASY TO CLEAN AND MAINTAIN

Dräger PSS® 3000

Today's first responders demand reliability and consistency from their breathing apparatus whatever the environmental conditions. Resulting from years of research and extensive user consultation, the Dräger PSS 3000 has been developed to meet these fundamental needs:

LIGHT, ROBUST AND SIMPLE TO USE

Dräger PSS 3000 is one of the lightest self contained breathing apparatus carrying system to date. We have applied the same advanced technology and design philosophy which was derived from our class leading range of short and extended duration professional breathing

apparatus. The extremely durable carrying system features our new and innovative ultra lightweight, high strength carbon composite carrying frame which exhibits outstanding thermal, impact and chemical resistance properties.

Suitable for use in all conditions easy and quick to don, the lightweight harness has been specially designed to retain its form over a wide range of environmental temperatures. Utilizing materials that have good chemical and abrasion resistance and also meeting the heat and flame requirements of EN137:2006 (Type 2).
